## Technical Skills

---

**Languages:** C++, Python, JavaScript

**Frontend:** HTML, CSS, React, Tailwind

**Backend:** Node.js, Express, Flask

**Databases:** MongoDB, SQLite

**Tools:** Git, GitHub, VS Code, Linux

## Projects

---

### Student Activity Hub

Feb 2026 – Apr 2026

*React.js, Node.js, Express.js, MongoDB*

*GitHub*

Built a full-stack student activity management platform using React.js, Node.js, Express.js, and MongoDB to centralize event discovery and participation

Designed secure RESTful APIs with JWT authentication and role-based access control (RBAC) for managing users, events, and registrations

Developed responsive React-based dashboards with dynamic filtering and real-time event updates to improve user experience

Implemented event registration and participation tracking features, reducing manual coordination for student activities

### Mental Health Chatbot (MindEase)

Jul 2025 – Sep 2025

*Python, Flask, NLP, SQLite*

*GitHub*

Developed an AI-powered mental health chatbot using Flask and NLP techniques to provide real-time emotional support and conversational assistance

Integrated VADER-based sentiment analysis and transformer-based models (BlenderBot) to generate context-aware responses based on user emotions

Implemented features such as mood tracking, journaling, and personalized recommendations to enhance user engagement

Designed features like mood tracking, journaling, and personalized recommendations

### eSim Automated Tool Manager

May 2026

*Python, CLI, System Automation, Linux*

*GitHub*

Developed a Python-based CLI tool to automate installation and management of eSim dependencies like Ngspice and KiCad

Implemented features for bulk installation, version checking, dependency validation, and tool status monitoring

Designed modular architecture with separate components for installation, checking, and utility functions

Built logging system and OS detection to improve reliability and usability on Linux-based systems

## Experience

---

### Summer Intern

May 2026 – Present

*FOSSEE, IIT Bombay*

*Remote*

Developing a Python-based CLI tool to automate installation and management of eSim dependencies (Ngspice, KiCad)

Optimized installation workflows by automating multi-step dependency setup, reducing manual configuration effort

Collaborating with FOSSEE team to test, debug, and improve system performance across Linux environments

## Education

---

### VIT Bhopal University

*B.Tech in Computer Science and Engineering (CGPA: 8.76)*

Madhya Pradesh

2024 – Present
